

EasyMapper Flash 2.0 Component - ReadMe

Last Updated : 03/23/2004

Purpose : Instructions on how to modify the look of your easymapper flash component.

Company : Reflekt Media Inc.

Contact : Craig Carns

Phone : 253.226.6455

You can customize the following properties of your map by changing the vaules of config.xml file.

Here are the parameters you can set:

xmlfilename : specify the file path to the xml results file. Default value is storesxml.asp

showstorecount : YES OR NO -- Display the total stores text or not.

icon : Accepts a value between 1 and 4

- 1 = Circle
- 2 = X
- 3 = Square
- 4 = Flag

resultswindow : Target HTML window

- "_self" specifies the current frame in the current window.
- "_blank" specifies a new window.
- "_parent" specifies the parent of the current frame.
- "_top" specifies the top-level frame in the current window.

resultspage : Target page to send form post of state choice

minradius : Numeric value of minimum radius distance to return on the results page. Default value is resultsbyradius.asp sample page.

maxradius : Numeric value of maximum radius distance to return on the results page. Default value is resultsbyradius.asp sample page.

- The following parameters accept a valid 6 character hexadecimal
- RGB value (like HTML- Example : "FF0000" is red)

mapcolor : The states main color

coloroftext : The font color of text displayed on map

linecolor : The outline color of your state borders

[**NOTE** : If you would like to disable the point click mapping to the resultspage just set resultspage=""]

Easy To Find Us – Easy Mapper Flash Component
